RE(L)AX-ED FABRICATION
OF IMPLANT BRIDGEWORK

 **ceramill[®] m-gin**
for REAX bridges

CERAMILL RE(L)AX. FABRICATE IMPLANT-SUPPORTED BRIDGES WITH GINGIVA SECTIONS RELIABLY, QUICKLY AND VERY EASILY

Ceramill CAD/CAM provides a reliable, easy system solution for in-house fabrication of implant-supported bridges with gingiva sections (Ceramill REAX - **Reliable All-on-X**). The CAD design is created using Ceramill M-Gin - an upgrade module for Ceramill Mind software. In CAM-based fabrication specially developed milling strategies enable 5-axis external processing to produce the finest detail definition. Users can take advantage of the new cut-back tooth library when designing customised anterior teeth. The highly translucent zirconia Ceramill Zolid White including Ceramill Liquid colour solutions complete the range.

_ Intuitive user guidance throughout the design process

_ Highest standards of aesthetics at the press of a button thanks to the new cut-back library by Knut Miller

_ Special milling strategies reduce manual reworking to a minimum

_ Coordinated processes and materials create a high degree of reliability and efficiency

ORDER INFORMATION

179145	Ceramill M-Gin - gingiva software upgrade for Ceramill Mind
179701	Ceramill Mindforms cut-back extension (for existing customers)
179700	Ceramill Mindforms 2.0 by Knut Miller (for new customers)
